Color Palettes

The concept behind the color choices was to limit the basic palette to cooler, neutral colors to offset imagery such as photos and illustrations that will be added along the way. However, brighter/warmer tones can be introduced on pages that students will be viewing.

Images

Images such as these can give the WME site a warmer, more inviting feel. They would primarily be used on introductory/home pages, not necessarily on topic module/topic lesson pages.
Beginning Ideas for Interface and Navigation

Will there be one homepage for both users of WME and individuals looking for more information? If so, how will the navigation function?
WME | Web-based Mathematics Education

Welcome!
WME is a modern Web-based Mathematics Education system that delivers classroom-ready lessons to teachers and students. The lessons are interactive, fun, and very educational.

The advantages and effectiveness of WME will be clear as you explore what this site has to offer.

( Teachers could login from the “Individual School Sites” page)
